

NCR SelfServ™ 85 Slimline

Kiosk

Want to enhance customer service and offer a differentiated store experience?

YES

The NCR SelfServ 85 Slimline is a compelling interactive touchpoint for your customers

The NCR SelfServ 85 Slimline helps you engage customers, deliver information and promotions, and enable transactions through a large screen kiosk with a stylish appearance and small footprint. Multi-touch capabilities and integrated peripherals provide flexibility and functionality, creating an intuitive, convenient and secure experience for your customers.

- **Provide detailed product information**

Studies indicate that consumers finalize the majority of their buying decisions while they are in the store. With the NCR SelfServ 85 Slimline, you can provide your customers with a way to access pertinent information about your products and services while they are in your store. Further, the kiosk enables you to arm your associates with an additional sales tool, expanding their knowledge base and allowing them to help customers find what they need.

- **Drive revenue and avoid out-of-stock situations**

The NCR SelfServ 85 Slimline gives your customers the ability to purchase products not available or out-of-stock in your store, which is essential in today's competitive retail environment. This helps to prevent customers from leaving and going to another retailer or online seller. Additionally, the kiosk can help drive incremental revenue for smaller store formats by giving customers in-store access to a retailer's range of products via the on-line store.

- **Enhance customer service**

The NCR SelfServ 85 Slimline can help you improve the in-store experience, making it easier to engage, influence and convert customers. Today's customers are time-starved, and anything you can do to make it faster, easier and more convenient for them to shop in your store can translate into customer loyalty and a growth in top line revenue.
